

General anaesthesia for adult special care dental patients

Monday 15 January 2018

BDA, London

5 ¼ hours CPD

08:45 *Registration, refreshments and exhibition*

09:30 **Welcome**

Balqees Bi

09:40 **Assessing the patient for comprehensive dental care under general anaesthetic**

- Look at best practice for assessing special care cases for GA
- Look at current guidelines and professional opinion to establish a robust and comprehensive GA assessment process for Special Care Patients.

Simon Utting, Chair Yorkshire and Humber Special Care Dentistry Managed Clinical Network

10:30 *Refreshments and exhibition*

11:00 **Treatment dilemmas and considerations: Adult GA comprehensive care cases**

- Consider current and future challenges in providing comprehensive care under GA
- Consider potential treatment planning options and their limitations
- Review modalities of treatment and their effects on treatment planning.

Andrew Kwasnicki, Consultant in Special Care Dentistry, Liverpool University Dental Hospital

12:00 **Syndromes, airways, subterfuge and the demise of the gas man**

- Explore the impact of syndromes on general anaesthesia
- Use of sedative pre-medication
- The role of anaesthesia by intravenous infusion instead of by inhalation.

Peter Bamber, Consultant Anaesthetist, Calderdale & Huddersfield NHS Foundation Trust

12:50 *Lunch and exhibition*

13:50 IV sedation or GA?

- Consider the roles of IVS and GA in an integrated service
- Update knowledge on the use of intranasal sedation
- Consider the management of special groups: medically compromised, bariatric patients.

Nick Ransford, Consultant in Special Care Dentistry, Birmingham Community Foundation NHS Trust

14:30 The role of the learning disability team in planning care

- Discuss the role of the Learning Disability Nurse when supporting complex patients having a GA
- Discuss complex cases
- Discuss the challenges of different environments.

Serena Jones, Learning Disability Acute Liaison Lead Nurse, Merseycare NHS Trust

15:30 Mental Capacity Act: Advice on best practice

- Evidence based capacity assessments
- Best interests - a balance sheet approach
- Restriction, restraint and deprivation; what when how.

Tim Whaley, Head of Mental Health/Mental Capacity Act, Leeds Teaching Hospitals

16:00 Case Presentations

- Aid in correct patient selection for a general anaesthetic
- Highlight the common conundrums faced when treating patients under general anaesthetic
- Highlight the importance of this treatment modality.

Lauren Firth, Specialist in Special Care Dentistry

16:30 Close

**General Anaesthesia for paediatric dental patients
Tuesday 16 January 2018
BDA, London**

5 ¼ hours CPD

08:45 *Registration, refreshments and exhibition*

09:30 **Welcome**

09:40 **Paediatric GA, past, present and future - change is good**

- Understand the history behind the changes to dental regulations for dental general anaesthesia
- Understand the clinical and contractual challenges to providing dental general anaesthesia in a district general hospital
- Learn how the challenges impact on the ability to implement the guidelines.

Helen Pailthorpe, Head of Service, Berkshire Community Dental Services

10:30 *Refreshments and exhibition*

11:00 **An Anaesthetists viewpoint on the shared airway and the challenges we face together**

- Why the paediatric dental list is challenging for the Anaesthetist
- Airway decisions - what are the options?
- The growing problem of childhood obesity.

Catherine Sheehan, Consultant Anaesthetist, Chelsea and Westminster NHS Foundation Trust

12:00 **How do we measure quality and value for money in dentistry, specifically GA management?**

- How is quality defined?
- Costs?
- Need?
- What is 'value for money'?
- Can quality and value for money co-exist and how should this be driven.

Deborah Manger, Deputy Medical Director and Specialist in Special Care Dentistry, Northamptonshire Healthcare NHS Foundation Trust

12:50 *Lunch and exhibition*

13:50 Right assessment, right plan, right team: Decision making in paediatric dental general anaesthesia treatment planning

- Analyse your current dental paediatric general anaesthetic planning
- Develop a suitable approach to meet the needs of your service
- Justify your decision making in regard to dental paediatric general anaesthetic planning.

Thomas O'Connor, Tutor in Medical Leadership, Cambridge University Institute of Continuing Education

14:50 Questions/Discussion

15:10 Pre-and post-operative care of our paediatric patients from a nursing perspective

- The role of the nurse within family centred care
- Effective pain and anxiety relief
- Caring towards a positive hospital experience.

Jane Geddis, Paediatric Sister, Alexandra Day Unit Paediatrics, Princess Alexandra Hospital, Harlow

15:30 Looking after children's teeth under a general anaesthetic - It is more than just baby teeth

- Present the pathway prior to treatment under general anaesthetic
- Present the pathway for treatment under a general anaesthetic
- Explore how the treatment plan is formulated and justified under general anaesthetic
- Look at the post op general anaesthetic pathway for the paediatric patient

Eleni Verykaki, Specialist in Paediatric Dentistry

16:30 Close
