PROFESSIONAL DEVELOPMENT 2019

Helping you meet your verifiable CPD requirements

bda.org/learning
Professional development 2019

Our professional development portfolio covers a broad spectrum of training, clinical seminars, conferences, webcasts, online qualifications and advice documents for the whole dental team.

HOW TO BOOK EVENTS

Online: bda.org/events

OR complete the booking form on the back of this booklet in BLOCK CAPITALS and return with your payment to:

The Events Department,
British Dental Association,
64 Wimpole Street, London W1G 8YS.
020 7563 4590 | events@bda.org

CPD

All events meet the criteria set for verifiable CPD, in line with the GDC’s enhanced CPD scheme (launched January 2018). The GDC has set four development outcomes that your CPD must be mapped against, and to assist with your planning, each CPD activity is marked with the relevant anticipated GDC development outcomes.

Refreshment and lunch breaks cannot be counted towards your verifiable CPD hours. A certificate of attendance will be provided at the end of each event.

CPD HUB

Our CPD Hub allows members to earn, record and manage CPD through one convenient online service.

Non-members and Dental Care Professionals can access the Hub too for CPD on oral cancer, safeguarding and Data Protection Officer training.

cpd.bda.org

VENUES

Events will be held at our headquarters at 64 Wimpole Street, London unless stated otherwise. Events in other cities will usually be held in central locations. Details will be listed on our website and sent at the point of confirmation.

ACCOMMODATION

If you wish to stay overnight during the event please contact MICE Concierge, our appointed hotel booking agency.

01438 908 777 | hello@miceconcierge.com

REFRESHMENTS

Event fees include refreshments and lunch. Please advise at time of booking of any special dietary requirements.

BOOKING TERMS AND CONDITIONS

Full payment must be made prior to the date of the event. Once submitted this booking form constitutes a firm booking which can only be cancelled in accordance with our cancellation policy. Terms and conditions and details of our cancellation policy can be found on our website:

bda.org/events/tandcs

Due to unforeseen circumstances, the programme may change and we reserve the right to cancel the event or alter the venue and/or speakers.

Save on training costs

Join the BDA and you will save 20% or more on each event

A new hands-on masterclass designed for clinicians who wish to excel and become competent in the justification, optimisation and reporting of small field of view CBCT.

**Learning objectives**

- Compare 2D conventional radiographs and 3D CBCT imaging
- Gain the skills needed to justify, take and interpret CBCT scans for the different dental disciplines
- Write actionable CBCT reports.

**Course format**

The course contains 21 hours of verifiable CPD in a combined learning format to ensure it suits all learning styles and can fit around busy clinical practice.

- **Pre-course foundation:** Delegates will receive a pre-course literature pack (3 hours)
- **Day 1:** Saturday 26 January/11 May: One-day seminar and hands-on reporting (6 hours)
- **Self-directed reporting exercises:** provided by the faculty to complete in your own time (8 hours – eight exercises on USB key with enclosed software – each takes one hour)
- **Day 2:** Saturday 23 February/22 June: Case presentation of CBCT reports by the delegates and reflection. Feedback from the faculty on the reporting exercises prepared by the delegates. (BDA, London) (4 hours).

This BDA Masterclass builds on previous basic knowledge (IRMER), which the delegates are strongly advised to have completed prior to attending the course.

**Lead speakers**

- **Simon Harvey**
  Consultant in Dental and Maxillofacial Radiology, Honorary Lecturer, King’s College London Dental Institute

- **Shanon Patel**
  Consultant Endodontist and Senior Lecturer in Endodontics, King’s College London Dental Institute and Specialist Practice

Full list of speakers and biographies can be found at [bda.org/cbct](http://bda.org/cbct)
Handling complaints and managing difficult patients

Learn how to use complaints as a positive management tool to enhance your relationship with your patients.

Overview

Skilful handling of complaints is essential to modern business management as reputation and customer goodwill are paramount. If handled properly, a complaint can enhance relations and turn a potentially lost customer into a satisfied patient.

This interactive course explores the official complaint handling procedures for both NHS and private practices and will equip you with excellent customer care and key communication skills to help you and your team manage angry, aggressive, nervous and upset patients. Gain the ability to diffuse upset patients and greatly reduce the possibility of complaints escalating to a Fitness to Practise case.

Learning objectives

• Understand the formal procedures of complaint handling for NHS and private practices
• Implement an effective complaints policy and procedure within your practice
• Consider how well your team communicates with your patients
• Identify how to improve customer service and avoid complaints
• Recognise why patients can be difficult
• Understand why patients are nervous
• Understand how to defuse angry or upset patients and remain calm and in control
• Maintain rapport during difficult, aggressive conversations.

Speakers

Richard Birkin
Head of Advice Liaison and Development, BDA

Heather Dallas
Managing Director, Dallas Development

Running a safe and compliant practice

LONDON
Friday 29 March 2019

6 hours verifiable CPD
Development outcome A B C D

BDA members £150
Non-members £195
DCPs £95

09:30 – 16:45
(registration from 09:00)

Explore the guidelines set out by the CQC and GDC to ensure your practice is compliant to nationally-recognised standards.

Overview

At times it can seem quite impossible to comply with all your obligations: “Is your service/practice safe? Is it caring? Is it responsive? Is it effective? Is it well led?” These are the CQC key lines of enquiry.

Learning objectives

• Be up to date on the key issues surrounding CQC
• Understand the health and safety issues in dentistry
• Be up to date on decontamination and infection control compliance
• Be up to date with the GDC’s standards, complaints and fitness to practise procedures
• Understand the policies surrounding consent, confidentiality and data protection.

Speakers

Data Protection Officer (DPO) training

ONLINE COURSE

An online course providing the tools you need to become an effective DPO.

Overview

GDPR places greater obligations on how organisations handle personal data, including the need for many organisations to appoint a Data Protection Officer.

This course will outline the impact of GDPR, provide you with all the tools you need to become an effective DPO and help you ensure that your practice is compliant.

Learning objectives

- Explain the impact of GDPR and why a DPO is needed
- Outline the role and responsibilities of the DPO
- Understand data protection law and how it applies to your practice
- Explain the rights that individuals have under GDPR
- Identify and action a data breach and transfer information securely.

Course cost £95

Development outcome A B C D

See page 8 for details of our GDPR course
GDPR: NHS Practices – how to be a DPO in a dental practice

Overview
This half-day course provides clear and concise advice for those seeking to take on, or who are already performing, the role of Data Protection Officer (DPO) in a general dental practice. The course provides an overview of the role and responsibilities as well as the tools to become an effective DPO and comply with GDPR.

Discuss scenario-based situations with peers, listen to practical advice, and get the answers to all your GDPR questions.

Learning objectives
• Understand the GDPR and regulatory framework
• Decipher the relevance of GDPR in a dental practice
• Understand the role of a Data Protection Officer (DPO)
• Be able to perform preparatory work for GDPR compliance
• Understand what a data breach is and how to respond to a breach incident
• Be familiar with key compliance documents.

Although there is no definitive list of who can and who cannot be a DPO, the DPO should not be the person who determines what information is used for at the practice, which is usually the practice owner.

Speakers
This course will be delivered by BDA professional advisers. Full biographies can be found at bda.org/training

Sponsored by

Advice is available on this topic bda.org/advice

Members only
As a dental professional, you have a clear responsibility to understand and implement effective decontamination procedures within your practice to ensure a safe environment for all patients and staff.

This short course will cover all the essential information you need to know to enable you to do this.

This course is designed to provide participants with a thorough grounding in all aspects of dental decontamination, and is also broad enough to act as a comprehensive refresher course for those who already have some experience in this field.

Course components:

1. Introduction
2. Infectious conditions
3. Hand hygiene
4. Personal protective equipment
5. Preparation of environment
6. Introduction to dental equipment
7. Cleaning methods
8. Sterilisation.

By the end of the course, participants will have an understanding of the principles behind decontamination, the knowledge and skills necessary to carry out common decontamination tasks, and an awareness of the regulations of all UK nations.

Dementia-friendly dentistry

Treating patients with dementia competently and confidently.

Overview
This one-day course will improve your awareness of dementia and your ability to confidently deliver dementia-friendly dentistry.

Dementia is a growing concern among the UK population, with the number of sufferers forecast to increase to over 1 million by 2025*.

Dementia has a wide range of implications for dental professionals including: patient identification, competence and referrals, communication, consent and capacity, history taking, treatment planning, care delivery and prescribing.

The programme explores the different types of dementia and considers how the priorities, treatment and practicalities of management change as the condition develops. How the practice environment and interaction with the dental team can help with the fear and anxiety experienced by patients with dementia will also be discussed.

(*Alzheimer’s Society Dementia UK report published in 2014)

Learning objectives
- Understand dementia and how it affects a person’s behaviour
- The role of the general dental practitioner in dementia awareness
- Explore the issues regarding consent and the Mental Capacity Act
- Understand the importance of collaborative action and oral health risk assessment
- Planning treatment for the worn dentition.

Speaker
Kerry Wafer

Leading the dental team

LONDON
Friday 5 July 2019

Determine your strategy, goals and objectives and drive the performance of your business and your team.

As the head of your business there is an expectation that you will lead your team to success. As the pressure grows for businesses to increase their profitability year on year, business owners must determine the appropriate strategy and lead their teams to achieve it. The only way to achieve your strategic goals is to harness the whole team in pursuit of your vision. The success or failure of your leadership skills will become clearly visible in your results. A culture that fails to galvanise the entire team risks a radically negative impact on results.

This course is suitable for practice managers, principals and those in charge of the business.

Learning objectives

• Understand the different leadership styles and become aware of your own
• Have a thorough grounding in the principles of leadership
• Understand the difference between leadership and management
• Be aware of what followers expect from leaders
• Understand culture and how to unlock a high-performing team.

Speaker

Andy McDougall
Spot On Business Planning

Ensure that as a team and as individuals you are able to deal confidently with medical emergencies that may arise.

Medical emergencies can happen at any time in the dental practice. This interactive course will bring you up to date with the latest standards and procedures, equipping you with the necessary skills to manage a medical emergency with confidence.

**Learning objectives**

- Manage and prevent a medical emergency
- Prepare and use standard emergency drugs and medical equipment
- Assess risk by identifying the hazards which commonly cause emergencies
- Understand the key signs and symptoms of common emergencies and aid correct diagnosis
- Have practical experience of hands-on basic life support and CPR training.

NHS claiming regulations

Understanding the pitfalls and controls and explore the ‘grey’ areas of NHS regulations with the use of case studies and discussions with experts.

Overview

The NHS claiming regulations are notoriously difficult to interpret. Misunderstanding of these regulations can have serious consequences, leading to risk of major financial losses and possible referral to the GDC.

This interactive one-day course will offer formal training to practitioners who are new to the NHS system and those who require an update on the current system (introduced in 2006).

Learning objectives

- Be familiar with the relevant NHS bodies administering and monitoring NHS dentistry
- Understand the legislation behind NHS treatments and claims
- Know how legalisation is enforced relating to NHS/private boundaries and submission of forms and data
- Understand the key legal terminology and important definitions within NHS regulations and how these are interpreted
- Understand the pitfalls and controls around NHS regulations
- Know how dentists are monitored by use of data derived from FP17s
- Understand the Dental Assurance Framework, ‘28 day’ investigations and the ‘Powys’ judgement
- Recognise the importance of full and accurate clinical and up-to-date record keeping.

Speakers

Richard Birkin
Head of Advice Liaison and Development, BDA

Len D’Cruz
GDP, London and Dento-legal Advisor, Dental Protection Ltd

Oral health education for dental care professionals

ONLINE QUALIFICATION
Suitable for GDC-registered DCPs

Developed in partnership with OHE Southwest, this flexible, online qualification will help you learn the communication skills needed to educate your patients about their oral health.

The course covers the following topics:

- Diseases and conditions of the oral cavity
- Oral health target groups
- Delivering oral health messages
- Oral disease prevention
- Oral health and society.

You will be required to complete 27 modules, seven quizzes and a practise test over a period of eight weeks. Students will then be expected to complete a portfolio of practical work, before sitting an online examination.

Upon passing the final exam, you will be awarded the **BDA Education Certificate in Oral Health Education** – a nationally-recognised qualification that qualifies you to work as an oral health educator within your practice.

Find out more at [bda.org/ohecourse](http://bda.org/ohecourse)
Pain management

Uncover the latest developments in managing oral pain.

Overview
This seminar will provide an update on managing oral pain and modern oral surgery procedures that can be carried out in general dental practice. The speakers will also give you an opportunity to further your knowledge and skills by providing guidance on when to treat and when to refer.

The speakers will demonstrate how to diagnose acute and chronic orofacial pain and how to best manage this. The day will incorporate case studies and how you can learn from past circumstances.

Learning objectives
• Become familiar with techniques to prevent and manage acute pain
• Manage chronic trigeminal pain and understand when to refer complex patients
• Understand the differential diagnosis of chronic orofacial pain
• Be aware of how to diagnose and construct an initial treatment plan for TMD suitable for primary care.

Speakers
Justin Durham
Professor of Orofacial Pain, Newcastle University

Tara Renton
Professor in Oral Surgery, King’s College London

An IRMER course in dental radiography and radiation protection

Ensure you are complying with obligations under current legislation and good working practice.

Overview

Ionising Radiation (Medical Exposure) Regulations 2000 (IRMER) imposes significant requirements for patient protection. This course will bring you up to date with the legislation concerning dental radiography and ensure you are aware of statutory responsibilities. Covering the principles of justification, optimisation and limitations, this one-day course satisfies both the IRMER regulations and CPD requirements as recommended by the GDC.

Learning objectives

- Understand the principles of radiation physics
- Be aware of the risks of ionising radiation
- Understand the radiation doses in dental radiography and the factors affecting them
- Recognise the principles of radiation protection
- Be up to date on the statutory requirements, selection criteria and quality assurance
- Understand the various imaging modalities available, including digital imaging and 3D (CBCT)
- Understand the principles of radiographic interpretation and problems that may occur.

Speaker

Paul Nixon
Consultant in Maxillofacial Radiology, Liverpool University Dental Hospital and Royal Liverpool University Hospital

Full biography can be found at bda.org/training
Dental radiography for dental care professionals

ONLINE QUALIFICATION
Suitable for GDC-registered DCPs

Approved by the British Society of Dental and Maxillofacial Radiology and the Society of Radiographers, this online qualification will teach you how to use X-rays safely and how to take common dental radiographs.

The course covers the following topics:
- Introduction to radiation
- Introduction to radiography
- Intra-oral radiography
- Panoramic radiography
- Other practical techniques
- Quality assurance and the law
- Image interpretation.

You will be required to complete 25 modules, five quizzes and a practise test over a period of eight weeks. You will then be expected to complete a practical portfolio consisting of 40 radiographs:
- Panoramics
- Bitewings
- Paralleling technique periapicals.

Upon passing a final exam you will be awarded the BDA Education Certificate in Dental Radiography, a nationally-recognised qualification that will entitle you to take radiographs unsupervised.

Find out more at bda.org/radcousen
This course is for all members of the dental team who are in a first contact position at the practice and involved in both face-to-face liaison and the receiving/making of telephone calls.

Overview
High standards of customer care, exceptional communication and good organisational skills are fundamental in securing and retaining patients. This course will equip you with the necessary skills to project the right impression, listen effectively and attentively, and cope with situations under pressure. Ensure your practice stands out from the competition.

Learning objectives
• Recognise the vital importance of generating a professional and approachable first impression
• Agree best practice for your team
• Understand how to put anxious patients at ease
• Learn how to juggle dealing with face-to-face patients and telephone calls at the same time
• Know how to deal with difficult situations with the use of assertiveness techniques
• Be able to build and maintain rapport with new and regular patients.

Speaker
Heather Dallas
Managing Director, Dallas Development

Record keeping and monitoring in NHS practice

Covering the essential do’s and don’ts in record keeping.

Overview

This half-day workshop explores current best practice for record keeping. Attendees will examine NHS regulations, the GDC and CQC requirements for record keeping, and receive a step-by-step guide to what clinical records should contain. Recent legal NHS claiming precedents will be discussed and the consequences of not keeping good records will be demonstrated.

Understand how not to record the consent process, and the importance of making the dental team aware of how NHS Area Teams (ATs) and the Business Services Authority (BSA) monitor GDP quality, performance and claiming abuse through clinical records.

Implement effective processes which can be followed, with confidence, by the whole dental team.

Learning objectives

• Encourage audit of record keeping
• Improve knowledge of relevant legislation
• Increase the involvement of the dental team in record keeping
• Improve record keeping.

Compromised teeth and failing restorations

LONDON
Friday 22 February 2019

6 hours verifiable CPD

Assessment, communication, control of patient expectations, decision making and clinical execution.

Overview

Clinical evidence and our understanding on revision/re-do dentistry has improved significantly over recent years and there are now many adjuncts that we can all use to help achieve a good prognosis for compromised teeth and restorations that fail. The speakers will tackle the issues of dealing with the difficult and upset patient, understanding the dento-legal implications and risks associated with these cases.

Peter and Phil will share their knowledge, experience and skills to provide an informative seminar for dentists who are clinically operating to tier 1, 2 and 3 clinical complexity (as outlined by the New NHS Commissioning Standards) on this important and growing area of dentistry. They will demonstrate how to manage particular problems and will show some of the problems they have experienced with their own patients.

Learning objectives

- Increase your knowledge on how long restorations last and how they fail
- Communicate confidently with your patients with failed restorations
- Understand dento-legal implications and risks associated with clinical failures
- Understand biological and mechanical failures and the challenges they bring
- Learn from clinical examples.

Speakers

Peter Briggs
Consultant in Restorative Dentistry, Bart’s and London Dental Institute, Specialist Practitioner, Hodsoll House Dental Practice

Phil Taylor
Professor in Prosthodontics, Clinical Director Dentistry and OMFS Barts Health NHS Trust, Consultant in Restorative Dentistry, Royal London Hospital

Prefering for retirement

BIRMINGHAM EV398
Friday 15 March 2019

6 hours verifiable CPD

A comprehensive and independent guide to retirement planning.

Overview
This seminar will guide you through all the financial, legal and emotional implications that you need to consider when planning your retirement. The seminar is presented by a panel of experts who have helped thousands of dentists plan for their future and includes a recently retired dentist. It is suitable for all GDPs and their partners.

Learning objectives
- To gain financial advice on retirement
- To understand the benefits provided by the NHS pension schemes
- To learn how to manage the changes retirement brings
- To understand the issues associated with the sale of your practice.

Advice is available on this topic bda.org/advice

Members only
This course will cover the important key standards of child and adult safeguarding, focusing on Regulation 13 of the CQC Fundamental Standards.

Overview

Members of the dental team are in a position where they may either directly observe the signs of child or adult abuse or neglect, or they may hear something that causes them concern about the welfare of a child or adult who is at risk. The GDC states that the dental team has an ethical and legal obligation to take appropriate action if concerned about the possible abuse of a child or adult at risk; and also to ensure that children and adults are not at risk from members of staff.

Learning objectives

• Have an awareness and understanding of child and adult abuse
• Know how to manage and respond to abuse concerns, allegations and/or disclosures
• Be able to accurately document concerns and understand the appropriate referral mechanisms and information sharing
• Be able to assess risk and need and instigate processes for appropriate interventions
• Understand how to fulfil your ‘duty of care’ whilst considering best practice.

This course covers Levels 1 and 2. Please see website for more details.

- Data Protection Officer training – 5 hours
- Child protection and the dental team – 3 hours
- Oral cancer recognition toolkit – 3 hours
Gain the fundamental skills needed to succeed as a manager.

Overview

People management skills are not necessarily something you think about when you set out in a career in dentistry. Progression into a senior position, whether a dentist or DCP, can bring the responsibility of managing members of staff, which can often be a challenging and time-consuming part of the role, especially when your progression has been on the merit of your clinical achievement rather than your managerial experience.

This comprehensive two-day course will provide new and existing managers with updated tools and techniques to use in this ever-changing industry.

Learning objectives

- Select and recruit the right people for the job
- Manage yourself as ‘the manager’
- Gain leadership skills and understand different leadership styles to suit you and your team
- Manage staff performance; providing support and giving feedback
- Review staff development through effective appraisals
- Understand the importance of clear, two-way communication and how to embed it in your team.

Speaker

Helping you make the right restorative decisions.

Overview

Tooth wear is becoming an increasingly common problem in modern day dentistry and there are a large variety of conservative options available for treatment. However, this variety can also lead to confusion and apprehension. Making the right restorative decisions is key to success.

This comprehensive one-day course will discuss all aspects of the treatment of various types of tooth wear. It will be clinically orientated and delegates will come away feeling more confident and better able to treat this problem.

Learning objectives

- Treatment of localised anterior wear versus generalised wear
- What to consider when placing veneers on worn teeth
- Increasing vertical dimension – how to decide when and by how much
- Posterior onlays – preparation design, material choice and how to bond them
- Full mouth adhesive and conservative rehabilitation – techniques, considerations and sequence.

Full mouth rehabilitation

Using sequencing and accurate treatment techniques to ensure long-term success.

Overview
Despite the drive towards minimally invasive dentistry, there are still many patients who have failing, heavily restored dentitions that are not suitable for this type of adhesive dentistry and require traditional full mouth rehabilitation. This needs to be carried out at the highest level of precision in a structured, well-planned manner using predictable and accurate techniques in order to ensure long-term success.

There needs to be close co-operation and understanding between the clinician and the technician as well as extremely close correlation between technical stages and clinical stages to avoid errors.

The lecture will focus on the sequencing and treatment techniques needed. It will be clinically based and is aimed at experienced dentists and technicians.

Learning objectives
• How to assess and plan a full mouth rehabilitation
• Learn how to implement your occlusal training combined with the application of your restorative training
• Achieve close co-operation and understanding between the clinician and the technician to prevent inaccuracies
• Demonstrate the techniques used including tooth preparation, core restorations, bite registration, temporisation and cementation
• Troubleshooting – it doesn’t always go smoothly!

Enhancing the predictability and longevity of your restorations

LONDON
Friday 27 September 2019

PREPARATIONS, IMPRESSIONS, OCCLUSAL RECORDS AND CEMENTATION/BONDING.

Overview
Success of dental restorations should not only be measured by immediate outcomes such as patient comfort and appearance, but also by long-term survival and stability of the definitive restorations.

Long-term success is dependent on the level of precision at which treatment is carried out.

The presentation will be clinically orientated and focus on techniques and tips to enhance clinical outcomes.

Learning objectives
• Examine tooth preparation, guidelines and techniques
• Temporary restorations – how to change them from your worst enemy to your best friend
• Impression techniques – what to look for and how to obtain it
• Occlusal records – which ones, why, when and how
• Cementation and bonding procedures – which one, why, when and how.

Non-members £360
DCPs £170

09:00 – 17:00
(registration from 08:15)
A day with Pascal Magne
Update on anterior bonded restorations

Mastering direct, semi-(in)direct and indirect techniques

**Overview**
This course is for all practitioners wishing to update their skills in anterior bonded restorations using direct and semi-(in)direct composite resins and indirect porcelain veneers.

Step-by-step delivery procedures and strict adhesive protocols will be presented based on scientific evidence but also supported by 25 years of experience by the speaker.

**Learning objectives**
- Understand the philosophy and science of minimally invasive biomimetic restorative dentistry
- Update your knowledge about the best materials to use (including CAD/CAM) and when to use it
- How to conserve intact tissue complying with the biomimetic principle – Bio-emulation™
- Learn predictable, aesthetic anterior composite techniques for long-lasting composite resins
- Discover state-of-the-art in minimally-invasive concepts for direct, CAD/CAM semi-(in)direct and indirect techniques in composite resins and ceramics
- Learn careful treatment planning using diagnostic waxups and mock-ups for maximum predictability
- Learn strict adhesive protocols such as IDS, based on scientific evidence and experience.

**Speaker**
Dr Pascal Magne
Don and Sybil Harrington Foundation Professor of Esthetic Dentistry, University of Southern California, Herman Ostrow School of Dentistry

Full programme and biography can be found at bda.org/seminars
