## Chairmen's letter

Welcome to our new season of events for the Bromley and Beckenham Section.

We have a host of interesting speakers for you; we are privileged to have some well-known names who will inspire and entertain us. Our intention is to provide these lectures face-to-face, once more, at Chislehurst Golf Club. The evenings will consist of a lecture at 18.45, with registration at 18.30. The carvery meal will commence at 20.00 and the evening will conclude around 21.30. There is the opportunity for three of them to be delivered as webinars, should circumstances dictate, but we are not able to live stream the face-to-face lectures.

The dates will either be the first or second Tuesday of the month, apart from the Thursday 7 December Christmas 'Do', and the Thursday 9 March 2023 lecture (*NB: changed from 16 March*) with our lifelong friend, Professor Avi Banerjee. Avi will be updating us on *Advanced Minimum Intervention Restorative Dentistry*; this lecture was so popular previously we wanted him to return for an update. Our friend Tif Qureshi who will talk on Tuesday 7 February, on *The lifetime patient*, was postponed from James's last season. We are delighted to see him at last.

Our aim this year is to attract newcomers to the Section in order that they can enjoy meeting local members and also the lovely Golf Club facilities. We had large numbers attending the webinars last year and hopefully many of you will be local enough to visit this super venue and taste the delicious catering. Guest night at Christmas is an opportunity to bring loved ones or colleagues to enjoy a fun-filled evening with great entertainment and a Christmas raffle for the 'Ben Fund'.

It is great to welcome old friends to entertain us and new friends: Bizhan Shokouhi opens our season with *Digital implant planning and workflows in practice*, on Tuesday 11 October 2022. Bizhan is teaching at King's and working in practice in Kent. We have been delighted to make Bizhan's acquaintance and benefit from his expertise in the last couple of years.

Professor Mark Ide has kindly agreed to treat us, once again, this time to an update on *Obesity and prediabetes, ageing and periodontal disease and what we can do about it*. COVID-19 highlighted some interesting inflammation-related data which I am sure he will enlighten us with. This will take place on Tuesday 8 November; it is lovely to welcome him back.

Our Christmas speaker is Gan Dharrie-Maharaj, entertaining us with *Human factors - Preventing never events*, on Thursday 7 December. This is an evening to bring your guests along, a chance to enjoy some bubbles and a delicious Christmas meal!

In the New Year, Suk Ng is returning to us: she will be speaking on *CBCT and considering whether it is being over-used, plus a close look at medico-legal issues*. This takes place on Tuesday 17 January 2023. Our super, recent past Chairman, Stephen Henderson, on Tuesday 4 April, will be imparting his expert knowledge on *Claims in negligence* and our good friend, Anish Shah, will be delivering *ABC of medical emergencies* at our AGM meeting on Tuesday 9 May.

Why not bring your team for a shared experience of learning, bonding and building?

Looking forward to seeing you all and having a fantastic year together.

Best wishes

*Charlie & James*

Charlie Spedding and James Aquilina
