Essex Branch

Speakers:

Trevor Burke
DDS, MSc, MDS, MGDS, FDS RCS (Edin), FDS RCS (Eng.), FFGDP(UK), FADM

- Trevor Burke graduated from Queens University in Belfast. He worked in general dental practice in Manchester from 1974 to 1996, whilst also working in the Unit of Restorative Dentistry at the University of Manchester.
- He has been Professor of Primary Dental Care at the University of Birmingham and Honorary Consultant in Restorative Dentistry there since 2000.
- He has authored or co-authored 290 papers in peer-reviewed journals and been awarded over 80 research grants.
- His main research interests include properties and applications of tooth-colored restorative materials, and clinical evaluation of the performance of materials in general dental practice. In 1993 he established the PREP (Product Research and Evaluation by Practitioners) Panel, a group of dentists who carry out research in their practices. Trevor co-ordinates this group, which has now completed over 70 evaluations of materials and techniques, with the group having grown to 30 members across the UK.
- He is also an examiner for the Royal College of Surgeons of Edinburgh, was Chair of the Board of Board of Dental Protection until November 2014 and is the Editorial Director of Dental Update.
- Trevor’s time at the University is mainly spent being Director of the Masters course in Advanced General Dental Practice, this having been established 14 years ago as a campus-based (“live”) course, and which is now a Distance course for dentists anywhere in the UK and the world.

Martin Kelleher
- Martin Kelleher is a Consultant in Restorative Dentistry at King’s College London Dental Institute.
- He has lectured nationally and internationally on a wide variety of topics.
- He is a past President of the British Society for Restorative Dentistry.
- He was on the board of Dental Protection Ltd for 10 years and chaired the Advisory Committee on Dental Claims.
- He is on the GDC specialist lists in Restorative Dentistry and Prosthodontics.
- He is the author or co-author of many peer reviewed papers, a number of chapters in different books and some controversial opinion articles (see www.martinkelleher.co.uk to download some free PDFs) that are relevant to today’s lectures.
- Martin is in private restorative practice in Bromley, Kent.

Aims and Educational Objectives:

Following attendance on this course, participants will:

1. To demonstrate some useful clinical techniques and variations.
2. To improve understanding of patients’ real issues in relation to “cosmetic” dentistry and how to avoid some pitfalls in the “marketing” of it.
4. Know the significance of polymerisation shrinkage stress and how to avoid this being a clinical problem.
5. Know the matrix systems which facilitate the achievement of a tight and anatomical contact point.
6. Be aware of the materials and techniques which will lead to successful restorations in loadbearing situations in posterior teeth.
7. Understand how composite can be of help in the management of deep caries.

Programme:

Morning lecturer: Martin Kelleher
Restorative dentistry today and tomorrow
08:30 - 09:15
Registration and coffee
09:15 - 10:30
Clinical tips and tricks in modern restorative practice.
- Achieving acceptable results with minimal destruction
- Successful strategies for solving wear or aesthetic problems
- Managing dead or cracked teeth
- Multiple clinical case examples.

10:30 - 11:05
Coffee and trade show
11:05 – 12:30
Makeover Myths from the “Land of the Fee”
- Balancing potential patient benefits versus harm.
- Ethical and legal issues in the “marketing” of elective aesthetic dentistry.
- Understanding and delivering what is most important to that patient.
- Optimising outcomes for all concerned.

12:30 - 13:00
Open forum: The Future? Sunrise or Sunset Scenarios
Lunch
13:00 - 14:00
Afternoon lecturer: Trevor Burke
Restorative dentistry tomorrow means….Bonding and no amalgam!

13:00 – 14:00
Adhere today, gone tomorrow?
- How bonding to dentine works
- Clinical tips for reliable bonding
- No more generations, but what about the new Universal group of materials?
- Minimising post-op sensitivity
- Some case examples.

14:00 – 15:00
Coffee/tea
15:00 – 16:45
Is there life after amalgam?
The current status of glass ionomer restorations in loadbearing situations in back teeth
Stressless posterior composites:
(i) How to overcome the problems of polymerisation contraction stress
(ii) How to achieve an anatomically correct contact point
Managing deep caries in a vital, asymptomatic tooth – should we use composite or new tricalcium silicate materials?
Bulk fill – the way ahead or a step back
What the resin composite material of the future might look like

17:00
Close
