Ovid Medline

The library offers a free Medline and evidence based dentistry literature search service to all BDA members.

Contact us with details of the topic you would like searched (medical or dental) and we will search Medline, Cochrane and various other online sources for articles and/or details of guidelines/policy documents and email or post the results back to you within 2 working days.

You will receive a list of article references along with abstracts and a message to say if we have the particular journal available in the library as well as electronic copies of guidelines/policy documents where possible and references to them where not.

Want to search OVID Medline for yourself? Now you can with the Library’s new OVID Medline service. Just log in to the BDA website at www.bda.org, and follow the link from the Library pages.
Not what you’re looking for?

The British Library has a website called EThOS (Electronic Theses Online Service) which aims to provide a single point of access to all UK theses. Many theses are already on the system and those that aren’t will be digitised on request and then made available to you free of charge. There may be a charge for theses from certain institutions that do not offer open access. You must register on the EThOS site before requesting a document but registration is free.

For more information visit EThOS at: http://ethos.bl.uk
