A day with Pascal Magne
Update on anterior bonded restorations

Master direct, semi-direct and indirect techniques.
This course is for all practitioners wishing to update their skills in anterior bonded restorations using direct and semi-direct composite resins and indirect porcelain veneers.
Step-by-step delivery procedures and strict adhesive protocols will be presented based on scientific evidence but also supported by 25 years of experience by the speaker.

Learning objectives
• Understand the philosophy and science of minimally invasive biomimetic restorative dentistry
• Update your knowledge about the best materials to use (including CAD/CAM) and when to use it
• How to conserve intact tissue complying with the biomimetic principle – Bio-emulation™
• Learn predictable, aesthetic anterior composite techniques for long-lasting composite resins
• Discover state-of-the-art in minimally-invasive concepts for direct, CAD/CAM semi-direct and indirect techniques in composite resins and ceramics
• Learn careful treatment planning using diagnostic waxups and mock-ups for maximum predictability
• Learn strict adhesive protocols such as IDS, based on scientific evidence and experience.

Speaker
Dr Pascal Magne
Don and Sybil Harrington Foundation Professor of Esthetic Dentistry,
University of Southern California, Herman Ostrow School of Dentistry
Full programme and biography can be found at bda.org/seminars

Business essentials – what every practice owner needs to know

Learn how to interpret your financial accounts and fully understand how your business is performing.
This practical two-day course highlights what you don’t know about running a dental business but really should!
Carry out a strategic review of your systems and develop a business plan that is unique to you and your practice. Whatever your objective – transforming poor performance, preparing for sale, or taking your business to the next level with a vision for expansion – the commercial techniques are the same and this hands-on course will inform and prepare you. Reassess your direction, adapt to survive, gain motivation to implement change and ensure future prosperity.

Day one – equips you with the necessary know-how to assess your business’ current position, teaches a range of commercial techniques, and discusses how they can be applied to your business.
Day two – review how you have applied the techniques to your business to improve your financial results, seek further guidance and set out your next steps. Leave with a strategic plan unique to your practice and ready to implement change.

Learning objectives
• Appreciate how to drive profitability in your practice
• Develop a strategic plan that leads to a better financial future.

Speaker
Andy McDougall
Spot On Business Planning

Please note: this course is delivered in two parts and participants are expected to attend both days.
CBCT Small Volume Reporting Masterclass

A hands-on masterclass designed for clinicians who wish to excel and become competent in the justification, optimisation and reporting of small field of view CBCT.

Learning objectives

- Compare 2D conventional radiographs and 3D CBCT imaging
- Gain the skills needed to justify, take and interpret CBCT scans for the different dental disciplines
- Write actionable CBCT reports.

Course format

The course contains 21 hours of CPD in a combined learning format to ensure it suits all learning styles and can fit around busy clinical practice.

- Pre-course foundation: Delegates will receive a pre-course literature pack (3 hours)
- Day one: Saturday 12 October 2019: One-day seminar and hands-on reporting (BDA, London) (6 hours)
- Self-directed reporting exercises: provided by the faculty to complete in your own time (8 hours – eight exercises on USB key with enclosed software – each takes one hour)
- Day two: Saturday 16 November 2019: Case presentation of CBCT reports by the delegates and reflection. Feedback from the faculty on the reporting exercises prepared by the delegates. (BDA, London) (4 hours).

This BDA Masterclass builds on previous basic knowledge (IRMER), which the delegates are strongly advised to have completed prior to attending the course.

Lead speakers

- Simon Harvey
  Consultant in Dental and Maxillofacial Radiology, Honorary Lecturer, King’s College London Dental Institute
- Shanon Patel
  Consultant Endodontist and Senior Lecturer in Endodontics, King’s College London Dental Institute and Specialist Practice

Full list of speakers and biographies can be found at bda.org/cbct

Handling complaints and managing difficult patients

Learn how to use complaints as a positive management tool to enhance your relationship with your patients.

Skilful handling of complaints is essential to modern business management, as reputation and customer goodwill are paramount. If handled properly, a complaint can enhance relations and turn a potentially lost customer into a satisfied patient.

This interactive course explores the official complaint handling procedures for both NHS and private practices and will equip you with excellent customer care and key communication skills to help you and your team manage angry, aggressive, nervous and upset patients. Gain the ability to diffuse upset patients and greatly reduce the possibility of complaints escalating to a Fitness to Practise case.

Learning objectives

- Understand the formal procedures of complaint handling for NHS and private practices
- Implement an effective complaints policy and procedure within your practice
- Consider how well your team communicates with your patients
- Identify how to improve customer service and avoid complaints
- Recognise why patients can be difficult
- Understand why patients are nervous
- Understand how to defuse angry or upset patients and remain calm and in control
- Maintain rapport during difficult, aggressive conversations.

Speakers

- Richard Birkin
  Former Head of Advice Liaison and Development, BDA, GDC
  Expert Witness and BSA Clinical Adviser
- Heather Dallas
  Managing Director, Dallas Development

Full biographies can be found at bda.org/training
As a dental professional, you have a clear responsibility to understand and implement effective decontamination procedures within your practice to ensure a safe environment for all patients and staff.

This short course will cover all the essential information you need to know to enable you to do this.

This course is designed to provide participants with a thorough grounding in all aspects of dental decontamination, and is also broad enough to act as a comprehensive refresher course for those who already have some experience in this field.

Course components:
1. Introduction
2. Infectious conditions
3. Hand hygiene
4. Personal protective equipment
5. Preparation of environment
6. Introduction to dental equipment
7. Cleaning methods
8. Sterilisation.

By the end of the course, participants will have an understanding of the principles behind decontamination, the knowledge and skills necessary to carry out common decontamination tasks, and an awareness of the regulations of all UK nations.

---

Data Protection Officer (DPO) training

An online course providing the tools you need to become an effective DPO.

GDPR places greater obligations on how organisations handle personal data, including the need for many organisations to appoint a Data Protection Officer.

This course will outline the impact of GDPR, provide you with all the tools you need to become an effective DPO and help you ensure that your practice is compliant.

Learning objectives
- Explain the impact of GDPR and why a DPO is needed
- Outline the role and responsibilities of the DPO
- Understand data protection law and how it applies to your practice
- Explain the rights that individuals have under GDPR
- Identify and action a data breach and transfer information securely.

---

Managing endodontic complications and complexities

LEEDS  EV403
Friday 27 September 2019

How to improve treatment outcomes.
This one-day seminar will enable you to improve your treatment outcomes by managing endodontic complications and complexities successfully.

Learning objectives
- Effective diagnosis and treatment planning of complex cases
- Strategies for successful endodontic treatment
- Re-treatment or implant?
- How to successfully manage (non)dental pain
- Interactive case-based discussion: managing endodontic failures.

Speakers
Shanon Patel
Consultant Endodontist and Senior Lecturer, King’s College London Dental Institute and Specialist Practice

Federico Foschi
Consultant Endodontist/Senior Lecturer, Endodontic Postgraduate Unit, King’s College London; Specialist practice, London

Dementia-friendly dentistry

LONDON  ET469
Friday 13 March 2020

Treating patients with dementia competently and confidently.
This one-day course will improve your awareness of dementia and your ability to confidently deliver dementia-friendly dentistry. Dementia is a growing concern among the UK population, with the number of sufferers forecast to increase to over 1 million by 2025*. Dementia has a wide range of implications for dental professionals including: patient identification, competence and referrals, communication, consent and capacity, history taking, treatment planning, care delivery and prescribing.

The programme explores the different types of dementia and considers how the priorities, treatment and practicalities of management change as the condition develops. How the practice environment and interaction with the dental team can help with the fear and anxiety experienced by patients with dementia will also be discussed.

Learning objectives
- Understand dementia and how it affects a person’s behaviour
- The role of the general dental practitioner in dementia awareness
- Explore the issues regarding consent and the Mental Capacity Act
- Understand the importance of collaborative action and oral health risk assessment
- Planning treatment for the worn dentition.

Speakers
Kerry Wafer
Specialist Dental Nurse in Special Care Dentistry, Birmingham Community Healthcare NHS Foundation Trust

Laura Stenhouse
Senior Dental Officer Special Care Dentistry, Birmingham Community Healthcare NHS Foundation Trust

Stacey Parker
Associate Trainer, Alzheimer’s Society

A two-day hands-on endodontics course

Ensuring predictable endodontics in practice.
This exciting new two-day hands-on course has been designed for the busy dental practitioner who wishes to update their endodontic knowledge and practical skills. The course will be delivered through a combination of interactive lectures, demonstrations and hands-on exercises. The training provides a sound foundation on the biological aspects of endodontic disease as well as improving diagnosis (including CBCT). The course aims to enhance the dentist’s skills required to carry out predictable endodontic treatment using the latest preparation and obturation techniques. Try a variety of techniques and materials in an impartial setting.

Learning objectives
• Improve understanding of the aetiology of endodontic disease
• Ensure accurate diagnosis and the use of magnification with a dental microscope
• Appreciation of the subtle differences between some of the most popular instrumentation and obturation techniques
• Introduce predictability using contemporary endodontic techniques.

Speaker
Shanon Patel
Consultant Endodontist and Senior Lecturer in Endodontics, King’s College London Dental Institute and Specialist Practice

An IRMER course in dental radiography and radiation protection

Ensure you are complying with obligations under current legislation and good working practice.
Ionising Radiation (Medical Exposure) Regulations 2000 (IRMER) imposes significant requirements for patient protection. This course will bring you up to date with the legislation concerning dental radiography and ensure you are aware of statutory responsibilities. Covering the principles of justification, optimisation and limitations, this one-day course satisfies both the IRMER regulations and CPD requirements as recommended by the GDC.

Learning objectives
• Understand the principles of radiation physics
• Be aware of the risks of ionising radiation
• Understand the radiation doses in dental radiography and the factors affecting them
• Recognise the principles of radiation protection
• Be up to date on the statutory requirements, selection criteria and quality assurance
• Understand the various imaging modalities available, including digital imaging and 3D (CBCT)
• Understand the principles of radiographic interpretation and problems that may occur.

Speaker
Paul Nixon
Consultant in Maxillofacial Radiology, Liverpool University Dental Hospital and Royal Liverpool University Hospital

Full biography can be found at bda.org/training
Dental radiography for dental care professionals

Approved by the British Society of Dental and Maxillofacial Radiology and the Society of Radiographers, this online qualification will teach you how to use X-rays safely and how to take common dental radiographs.

The course covers the following topics:

• Introduction to radiation
• Introduction to radiography
• Intra-oral radiography
• Panoramic radiography
• Other practical techniques
• Quality assurance and the law
• Image interpretation.

You will be required to complete 25 modules, five quizzes and a practise test over a period of eight weeks. You will then be expected to complete a practical portfolio consisting of 40 radiographs:

• Panoramics
• Bitewings
• Paralleling technique periapicals.

Upon passing a final exam you will be awarded the BDA Education Certificate in Dental Radiography, a nationally-recognised qualification that will entitle you to take radiographs unsupervised.

Leading the dental team

DENTAL RADIOGRAPHY FOR DENTAL CARE PROFESSIONALS

LONDON
Friday 3 July 2020

Determine your strategy, goals and objectives and drive the performance of your business and your team.

As the head of your business there is an expectation that you will lead your team to success. As the pressure grows for businesses to increase their profitability year on year, business owners must determine the appropriate strategy and lead their teams to achieve it. The only way to achieve your strategic goals is to harness the whole team in pursuit of your vision. The success or failure of your leadership skills will become clearly visible in your results. A culture that fails to galvanise the entire team risks a radically negative impact on results.

This course is suitable for practice managers, principals and those in charge of the business.

Learning objectives

• Understand the different leadership styles and become aware of your own
• Have a thorough grounding in the principles of leadership
• Understand the difference between leadership and management
• Be aware of what followers expect from leaders
• Understand culture and how to unlock a high-performing team.

Management of medical emergencies in the dental practice

Ensure that as a team and as individuals you are able to deal confidently with medical emergencies that may arise.

Medical emergencies can happen at any time in the dental practice. This interactive course will bring you up to date with the latest standards and procedures, equipping you with the necessary skills to manage a medical emergency with confidence.

**Learning objectives**

- Manage and prevent a medical emergency
- Prepare and use standard emergency drugs and medical equipment
- Assess risk by identifying the hazards which commonly cause emergencies
- Understand the key signs and symptoms of common emergencies and aid correct diagnosis
- Have practical experience of hands-on basic life support and CPR training.

**Speaker**

Dan Purnell
Head of Operations, A to E Training & Solutions

NHS claiming regulations

Understand the pitfalls and controls and explore the grey areas of NHS regulations with the use of case studies and discussions with experts.

The NHS claiming regulations are notoriously difficult to interpret. Misunderstanding of these regulations can have serious consequences, leading to risk of major financial losses and possible referral to the GDC. This interactive one-day course will offer formal training to practitioners who are new to the NHS system and those who require an update on the current system (introduced in 2006).

**Learning objectives**

- Be familiar with the relevant NHS bodies administering and monitoring NHS dentistry
- Understand the legislation behind NHS treatments and claims
- Know how legalisation is enforced relating to NHS/private boundaries and submission of forms and data
- Understand the key legal terminology and important definitions within NHS regulations and how these are interpreted
- Understand the pitfalls and controls around NHS regulations
- Know how dentists are monitored by use of data derived from FP17s
- Understand the Dental Assurance Framework, ‘28 day’ investigations and the ‘Powys’ judgement
- Recognise the importance of full and accurate clinical and up-to-date record keeping.

**Speakers**

Richard Birkin
Former Head of Advice Liaison and Development, BDA, GDC Expert Witness and BSA Clinical Adviser

Len D’Cruz
GDP, London and Dento-legal Advisor, BDA

Oral health education for dental care professionals

ONLINE QUALIFICATION
Suitable for GDC-registered DCPs cpd.bda.org

Developed in partnership with OHE Southwest, this flexible, online qualification will help you learn the communication skills needed to educate your patients about their oral health.

The course covers the following topics:

• Diseases and conditions of the oral cavity
• Oral health target groups
• Delivering oral health messages
• Oral disease prevention
• Oral health and society.

You will be required to complete 27 modules, seven quizzes and a practise test over a period of eight weeks. Students will then be expected to complete a portfolio of practical work, before sitting an online examination.

Upon passing the final exam, you will be awarded the BDA Education Certificate in Oral Health Education – a nationally-recognised qualification that qualifies you to work as an oral health educator within your practice.

Course Fee £595 (+ £124 exam fee)

Pain management

MANCHESTER EV83
Friday 20 September 2019

Uncover the latest developments in managing oral pain. This seminar will provide an update on managing oral pain and modern oral surgery procedures that can be carried out in general dental practice. The speakers will also give you an opportunity to further your knowledge and skills by providing guidance on when to treat and when to refer.

The speakers will demonstrate how to diagnose acute and chronic orofacial pain and how to best manage this. The day will incorporate case studies and how you can learn from past circumstances.

Learning objectives

• Become familiar with techniques to prevent and manage acute pain
• Manage chronic trigeminal pain and understand when to refer complex patients
• Understand the differential diagnosis of chronic orofacial pain
• Be aware of how to diagnose and construct an initial treatment plan for TMD suitable for primary care.

Periodontal disease management 
now and in the future

How to improve treatment outcomes.
This highly informative seminar is designed to help provide better oral health outcomes for your patients. The speakers will also give you an opportunity to further your knowledge and skills by providing the truth about periodontal-systemic connections and providing possible solutions for periodontal disease management.

Learning objectives
• Understand how modifying diagnostic and communication behaviour will result in better oral health outcomes
• What does creating better oral health outcomes through changing behaviour all mean for me and my practice?
• Understand the truth about periodontal-systemic connections
• Are dental implants the ultimate solution?

Speakers
Iain Chapple
Professor of Periodontology and Head of the School of Dentistry, University of Birmingham

Tim Newton
Professor of Psychology as Applied to Dentistry, King’s College London Dental Institute

Nicola West
Professor/Honorary Consultant in Restorative Dentistry (Periodontology), Bristol Dental Hospital

Clinical digital photography for 
dental professionals

A lifetime of dental photography in a day.
This hands-on workshop will provide all members of the dental team with the practical know-how and confidence to make dental photography an integral part of everyday life in a busy dental practice.

Digital dental photography is useful for all disciplines of dentistry. An excellent dental image should have correct colour rendition and enough detail to show the oral clinical scenario. Readily integrating photography benefits patients, dentists and the whole support team.

The course is suitable for all dental professionals: Specialists, GDPs, Therapists, Hygienists and support staff. The course covers the technical and clinical know-how.

Learning objectives
• Foundation photography concepts and digital camera technology
• Understanding lenses, aperture, shutter speed and ISO
• Considering the specific setup for dental photography
• Understanding clinical photographs as a part of dental records
• A look at dental photography mirrors and retractors
• Extra oral and intra oral photographs.

Speakers
Ewa Assaker
Consulting Director, SmileWisdom; Registered Dental Nurse and former Practice Manager

Roger Bretayne
Photography Expert, SmileWisdom

The profitable practice

Business and management skills to grow your practice.
This programme has been designed to help your business reach its true potential. Immersing you in the non-clinical aspects of business in dentistry, it will enable you to think like a successful business leader and create top performance across the practice. Aimed at busy clinicians and their business managers, this is a step-by-step insight into how to move towards the business model you want and make a successful business your reality. The day will explore improving business acumen, leadership in business, marketing, those all-important financials and how to remain inspired.

Learning objectives
• How to run a profitable practice and have a life outside of the practice
• Insurance and finance for a successful dental practice
• How online marketing can help to ensure a patient chooses YOUR practice
• Driving footfall through exemplary customer service
• How to make a successful practice your reality.

Speakers
David Beckett, Financial Planner and Wealth Manager, Lloyd & Whyte
James Goolnik, Practice Owner and Dentist, Bow Lane Dental Group, London
Nigel Reece, Managing Director, Dental Design
Nicki Rowland, Owner, Practices Made Perfect Consulting
Paul Short, Head of Commercial Development, Lloyd & Whyte
Daz Singh, Dentist and Practice Owner, Liverpool
Amy Walters, Business Manager, Bow Lane Dental Group, London

Reception and telephone skills for the whole dental team

This course is for all members of the dental team who are in a first contact position at the practice and involved in both face-to-face liaison and the receiving/making of telephone calls. High standards of customer care, exceptional communication and good organisational skills are fundamental in securing and retaining patients. This course will equip you with the necessary skills to project the right impression, listen effectively and attentively, and cope with situations under pressure. Ensure your practice stands out from the competition.

Learning objectives
• Recognise the vital importance of generating a professional and approachable first impression
• Agree best practice for your team
• Understand how to put anxious patients at ease
• Learn how to juggle dealing with face-to-face patients and telephone calls at the same time
• Know how to deal with difficult situations with the use of assertiveness techniques
• Be able to build and maintain rapport with new and regular patients.

Speaker
Heather Dallas
Managing Director, Dallas Development

Full biography can be found at bda.org/training

LONDON
Friday 26 June 2020
The essential dos and don’ts of record keeping.

This half-day workshop explores current best practice for record keeping. Attendees will examine NHS regulations, the GDC and CQC requirements for record keeping, and receive a step-by-step guide to what clinical records should contain. Recent legal NHS claiming precedents will be discussed and the consequences of not keeping good records will be demonstrated.

Understand how not to record the consent process, and the importance of making the dental team aware of how NHS Area Teams (ATs) and the Business Services Authority (BSA) monitor GDP quality, performance and claiming abuse through clinical records. Implement effective processes which can be followed, with confidence, by the whole dental team.

Learning objectives

• Encourage audit of record keeping
• Improve knowledge of relevant legislation
• Increase the involvement of the dental team in record keeping
• Improve record keeping.

Speaker

Richard Birkin
Former Head of Advice Liaison and Development, BDA, GDC
Expert Witness and BSA Clinical Adviser

The essentials of staff management: a two-day intensive course

Gain the fundamental skills needed to succeed as a manager.
People management skills are not necessarily something you think about when you set out in a career in dentistry. Progression into a senior position, whether a dentist or DCP, can bring the responsibility of managing members of staff, which can often be a challenging and time-consuming part of the role, especially when your progression has been on the merit of your clinical achievement rather than your managerial experience.

This comprehensive two-day course will provide new and existing managers with updated tools and techniques to use in this ever-changing industry.

Learning objectives

- Select and recruit the right people for the job
- Manage yourself as ‘the manager’
- Gain leadership skills and understand different leadership styles to suit you and your team
- Manage staff performance; providing support and giving feedback
- Review staff development through effective appraisals
- Understand the importance of clear, two-way communication and how to embed it in your team.

Stress management and well-being for a healthy dental team

Stress cannot be avoided but it can and must be managed if we are to avoid the long-term effects it causes.

Delivered by experienced dental professionals this one-day course aims to help attendees understand and recognise the early signs of stress and its short and long-term effects on the body and mind. Whether you are feeling the burn-out yourself or want to improve the welfare of your team, this workshop provides tools and techniques to manage stress within a dental surgery setting and beyond.

Almost half of dentists* say stress in their job is exceeding their ability to cope, with common sources of stress linked to the threat of complaints and litigation, dissatisfied patients and concern about the GDC.

Learning objectives

- Recognise the early signs of stress
- Realise the importance of managing this stress on a daily basis and to limit it becoming chronic
- Learn techniques to manage this stress; in the surgery, during the working day and after work
- Realise the importance of self-care, setting realistic expectations and problem sharing.

Speakers

Hina Patel
Registered dentist and nutritional therapist

Saundra Fagan
Extended duties dental nurse, NLP Practitioner, Stress management and relaxation techniques coach (SMART), Massage Therapist and Reflexologist

*BDJ, 22 Jan 2019.
Tooth whitening for 2020 – science, myths and reality

Practical applications for your dental practice.
This course covers the current tooth whitening techniques used in dental practice. The day will discuss the classification of bleaching techniques in order to assist with predictable treatment planning for the various tooth whitening programmes.

The evaluation of new patients requesting bleaching will be explained along with the management of bleaching-related sensitivity and further associated problems that may arise.

The course also elaborates on all tooth bleaching techniques and how to combine these treatments with further aesthetic dentistry.

Learning objectives
• Explain the scientific basis of bleaching and identify the various dental bleaching techniques
• Clarify the answers to patients’ questions and concerns regarding dental bleaching
• Apply the knowledge of shade assessments for dental bleaching
• Implement dental bleaching photography
• Recognise the consent process and information patients require prior to undertaking tooth whitening procedures
• Manage problems associated with tooth whitening and dental bleaching
• How to utilise the dental team with bleaching, delegate hygienists and therapists in taking impressions for trays, shade taking and bleaching reviews.

Scottish Dental Conference and Exhibition 2019

A conference for the whole dental team.
This highly regarded one-day conference is a great opportunity for all dentists and their teams to update their knowledge and skills, as well as to engage with exhibitors at the vibrant exhibition.

Sessions include:
• Aesthetic restorative dentistry
• Digital implant dentistry
• Domiciliary care (CDS hosted session)
• Endodontics
• Mental health and well-being in the dental profession
• Oral cancer
• Periodontics: working together
• Tooth decay in children
• Minimally invasive management of tooth wear.

Speakers include:
Sanjeev Bhanderi, Specialist in Endodontics and Senior Lecturer, University of Liverpool
Fiona Elder, QIPT Tutor, NHS Education for Scotland
Louis Mackenzie, Clinical Lecturer, University of Birmingham Dental School
Lorna McCaul, Consultant in Restorative Dentistry, Glasgow Dental Hospital and School
Simon Morrow, Scottish Sedation Training
Adam Nulty, The Digital Dentist, Principal, Dentist ON THE ROCK
Rory O’Connor, Clinical Advisor, NHS England and National Coordinator, Dentists’ Health Support Programme

Full programme and biographies can be found at bda.org/scottishdental
